**BRRTS #: 02-23-096654**

Question: After reviewing the bid document for the Monticello Bulk Plank, I noticed that MW-8A is not depicted on map linked on the COMM website nor is it depicted on the maps that we obtained from case file copying. Can you please depict or describe the location of MW-8A?

Answer: This information was provided with the bid documents at the copy shop. Here is the available information (see .pdf file) about small diameter monitoring well MW-8A, which is located in the downgradient portion of the estimated plume - for your information.
